RULES

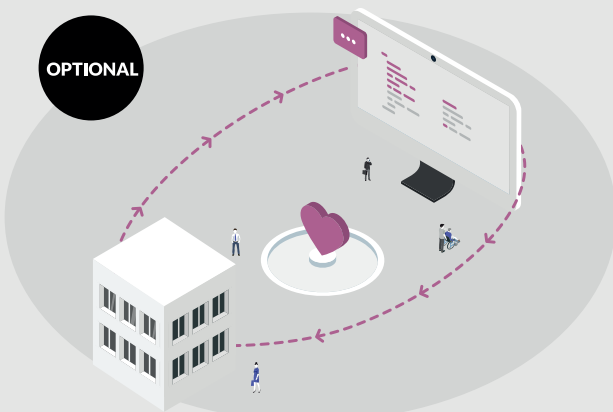

360° CARE CIRCUIT. With Rules Area, ResiPlus® becomes the best ally against mistakes and forgets caused by human error. Set rules and conditions in relation to the care of residents, and help staff to make better their daily job.

Create a ResiPlus® package to suit your centre

With ResiPlus® you can combine as many licences as you need in the way that best suits your requirements. We understand that every centre is unique and has specific requirements. For that reason, our software adapts to each one independently as a versatile and effective solution.

OPTIONAL

RELATIVES

A Web Application designed in order to improve communication between relatives and the Care Home. Its integration with ResiPlus® allows you to decide which data you would like to share and update with the family in real time, with no additional tasks. With ResiPlus® Relatives you can:

- Create and publish reports about care like the Care Plan from the data introduced in ResiPlus®.
- Publish news and share tasks calendars.
- Share invoices.
- Sent private messages.

About us

ADD Informática is a Spanish Company with one clear objective: to provide long-term care sector, like care homes, day care homes, disability care homes and occupational centres, with a tool to enable the comprehensive management of these centres in a configurable, flexible, effective and simple manner on as many supports as necessary (desktops, laptops, tablets, smartphones). This is the result of listening and responding to the needs, suggestions and contributions expressed by the present and future users.

Our experience from 1998, with 2.200 Care Homes and about 30.000 users, together with our commitment to the sector, makes us the provider of the benchmark technology solution.
